## About Me

QA Engineer with 3+ years of hands-on experience in mobile, web, and API testing. Known for identifying high-impact bugs early in the cycle and reducing bug leakage by up to 40%. Skilled in Agile environments, test case design, and collaborating with developers to ensure faster and more stable releases.

## Skills & Tools

- SDLC & STLC, System Architecture, Design Verification, Test Case & Test Planning.
- API Testing, API Tracking (One Relic), Postman, ApiDog
- SQL, MongoDB, Mongo Compass
- Smoke, Sanity, Regression, System Integration, and UAT Testing
- Load Testing Tools: JMeter, LoadRunner
- Mobile & Web Testing Tools: TestFlight, Android Studio
- Project & Bug Management: Jira, Trello

## Education

Bachelor of Technology –Mechanical Engineering

GIET University

2017-2021

## Experience and Projects

### QA Engineer

Ardem Data Solutions -India / Remote

Jan 2025 – Present

- Performed end-to-end testing of a GIS drawing platform, validating drawing behavior and coordinate accuracy.
- Wrote 80+ test cases, performed Postman-based API testing, and logged 30+ UI/functional bugs using JIRA.
- Helped improve test coverage by 35%.

### QA Engineer

Bijnis - Delhi / Hybrid

Mar 2022 – Oct 2024

- Led QA for multiple B2B e-commerce and sourcing platforms across Android, iOS, and web.
- Designed and executed 250+ manual test cases for key features including product discovery, ordering, and CRM workflows.
- Conducted load testing using JMeter; improved response times by 20% during high-volume order processing.
- Owned QA for the Smart Wholesalers module, validating UI, business logic, and MongoDB-backed data flows — enabling 500+ regional managers to manage buyer relationships efficiently.
- Identified and reported 100+ bugs; collaborated with dev teams to reduce post-release defects by 35%.

### Associate QA Engineer

Logicbuds / Remote

June 2021 – Mar 2022

- Executed manual and API testing for a health e-pharma platform.
- Validated 50+ critical flows including medicine search, order, and tracking.
- Logged 40+ defects and helped reduce post-release issues by 30%.

## Freelance Projects

Oct 2024- Jan 2025

### Dia Hotels (Android, iOS & Web)

- Tested booking flows across platforms. Wrote and executed 100+ test cases.
- Validated APIs with Postman and verified SQL data integrity.
- Performed end-to-end testing of Razorpay integration, including various payment and refund scenarios.
- Tested real-time booking updates on the admin dashboard via socket implementation to ensure live data accuracy.
- Logged 20+ critical bugs during regression.

### Veera Games (Web3 Gaming Platform)

- Tested Web3 gaming platform for login, wallet integration, and smart contract behavior.
- Performed API and UI testing to ensure glitch-free gameplay.
- Reported key UI/UX bugs that improved player retention.

## Projects at Bijnis

### Smart Wholesalers Module:

Led UI and functional testing of this CRM-like system used by field managers. Validated MongoDB data integrity and helped reduce support queries by 30%.

### Sourcing App Migration:

Tested the migration of native Android flows to React Native, ensuring feature parity across platforms. Reduced crash rate by 40% and improved release velocity.
